CUSTOMER JOURNEY MAP

Date	31 January 2026	**Team ID**	[Insert Team ID]
Project Name	Global Olympic Sports Performance Analysis (1992–2026)	**Maximum Marks**	2 Marks

Map out the customer's experience stage-by-stage: Capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage for **Ms. Priya (NOC Performance Strategist)** and **Mr. Carlos (Sports Investment Analyst)**.

Phase of Journey	Stage 1: Discovery & Needs Assessment	Stage 2: Dashboard Analysis & Data Exploration	Stage 3: Decision Making & Strategic Execution
Actions *What does the customer do?*	• Gathers historical multi-cycle Olympic data across 60 nations and 50 sports. • Identifies lack of clear insight on sport category return and regional efficiency. • Defines strategic funding and target criteria for upcoming Olympic cycle.	• Explores Tableau dashboards (`athletes.csv`, `medal_results.csv`). • Evaluates per-athlete medal yield (Shooting 1.656, Biathlon 1.690). • Benchmarks nation's performance against top leaders (USA 735, China 696).	• Formulates targeted grant distribution and discipline investment proposals. • Reallocates capital from low-yield team sports to high-productivity categories. • Presents evidence-based findings to executive committees and funding boards.
Touchpoint *What part of the service do they interact with?*	• Historical raw CSV datasets (1992–2026). • Internal NOC policy & strategic planning documents. • Initial stakeholder briefing meetings.	• Tableau Olympic Performance & Regional Efficiency Dashboard. • Global Sports Investment vs. Medal Performance bubble chart. • Regional Medal Efficiency & Distribution pie/donut charts.	• Final Strategic Investment Recommendation Report. • Executive NOC / Funding Agency Board Pitch Deck. • Budget allocation and grant distribution simulators.
Customer Thought *What is the customer thinking?*	*"Analyzing 8 cycles across 60 countries and 50 sports manually is overwhelmingly complex."*	*"High-yield precision sports like Shooting and Biathlon deliver far better per-athlete returns than bloated team rosters."*	*"We now have concrete, evidence-based metrics to justify multi-million dollar funding decisions."*
Customer Feeling *What is the customer feeling?*	• **Overwhelmed** by data scale and fragmentation. • **Uncertain** about optimal funding allocation choices. • **Apprehensive** regarding ROI on sports investments.	• **Enlightened** by clear visual trends and efficiency metrics. • **Confident** in data-backed performance patterns. • **Engaged** with interactive scenario comparisons.	• **Empowered** and decisive in resource allocation. • **Reassured** by empirical justification. • **Motivated** to drive long-term Olympic success.
Process Ownership *Who is in the lead on this?*	• NOC Performance Strategist (Ms. Priya) • Senior Sports Investment Analyst (Mr. Carlos)	• Analytics Team & Data Engineering Lead • Tableau Dashboard & Visualization Developer	• NOC Executive Board • International Funding Agency Grants Committee
Opportunities *How can we improve this stage?*	• Automate raw dataset ingestion and standard data cleaning pipelines.	• Implement scenario simulation filters (GDP tier, population, training budget adjustments).	• Export automated, board-ready summary reports directly from dashboard views.
